WELCOME TO MÜNSTER

Surprising discoveries every step and turn – Who expects a hip restaurant in medieval walls? Or the world's largest collection of graphics of Picasso behind the façade of a Westphalian court? While one of the last „Türmer“ of Germany is letting his horn sound from the top of the Lamberti church, elite researchers are turning institutes and hospital into a beacon of excellence. One can find jewels of baroque architecture right next to icons of contemporary architecture, with over 60 sculptures which testify the „skulptur projekte“ and turning Münster into a mecca of the international art scene every ten years. A traditional hospitality and cosy atmosphere as well as an exciting club scene or chic in-restaurants-located in the nightlife area at the harbor can be found here.

Why Münster is on the list of „Historic Highlights of Germany“, can be discovered in the city centre – this is where the heart of the more than 1,200 year old Hanseatic city beats. When walking over the Prinzipalmarkt, one can admire the gables of the old merchants' houses uniting in a magnificent silhouette, while the exclusive shops situated under the galleries invite to stroll along. Just around the corner one can discover the pulse of this city: the weekly market is one of the most beautiful markets in Europe. Among the shades of the impressive Paulus Dom one can find the traditional farmers next to organic producers, the dutch cheese and fish monger next to traders of Italian delicacies.

Though the multitude of impressions – Münster still gives space for leisure. Green oasis are just a minute-walk away – or even less by bike in „Germany's bicycle capital“. At the promenade, in the castle garden or the Aasee, where one can enjoy maritime feeling when watching the sailboats from the terrace. Or even further, when discovering the munsteranian parkland with its dreamy castles surrounded by moats.

Back in the lively atmosphere of the city you still have the choice between one of the 30 museums, a guided tour through the city following the tracks of the Anabaptists, a classical opera or a dynamic dance event in the evening, a historic presentation – or even spend a few days more or come back to Münster soon.

Dear colleagues and friends,

On behalf of the board of the German Society for Hygiene and Microbiology and the scientific committee we kindly invite you to our 67th Annual Meeting in Münster.

We are very happy to welcome you from 27 to 30 of September 2015 in the congress facilities of the Halle Münsterland. A wide range of topics in Microbiology, Hygiene and Infectious Diseases will be addressed. Various aspects from basic research to practical application should be discussed. We expect renowned national and international speakers to present their science in plenary sessions. Focused workshops and poster sessions build up further platforms for fruitful scientific discussions and knowledge exchange. Not least, we invite you to enjoy the beautiful town of Münster and its surroundings.

Thus, please plan to join our society meeting and support science in our field by submitting abstracts in all respective topic areas.

Sincerely yours,

Helge Karch
Institute of Hygiene

Georg Peters
Institute of Medical Microbiology

Abstract Submission

We cordially invite you to submit your abstract to the following topics. Abstracts for presentations or posters must be submitted online at www.dghm-kongress.de and in English only until 31 May 2015. The accepted abstracts will be published by Elsevier Publishing. An abstract will be presented as a talk or poster. A committee will select and award the best posters. Poster presentations will be organised by a scientific committee of the scientific and clinical working groups of the DGHM.

Abstract Topics

- Antimicrobial Resistance and Drugs, Infection Prevention
- Antimicrobial Resistance in Different Hosts
- Cases in Clinical Microbiology (Interactive Session)
- Clinical Microbiology and Infectiology
- Epidemiology of Zoonotic Pathogens
- Eukaryotic Pathogens
- Food Microbiology and Hygiene
- Gastrointestinal Infections
- General and Hospital Hygiene
- Host-Microbe Interaction
- Infection Immunology
- Microbial Pathogenicity
- Microbiological Diagnostics
- Microbiota, Probiota and Host
- Molecular Epidemiology of Microorganisms
- National Reference Laboratories and Consiliary Laboratories
- NGS Genome Analysis and Bioinformatic Tools
- Nosocomial Infections: Outbreaks and Surveillance
- Quality Management in Diagnostic Microbiology
- Zoonoses
